

## James Robar

PhD, FFCPM

Head of Medical Physics, Queen Elizabeth II Health Science Centre,  
Halifax, Canada

### Specialization

Medical physics of precision radiotherapy, 3D printing in radiotherapy, novel systems for image guidance and RT adaptation

### Spoken Language

English

### Professional Experience

- Chief of the Department of Medical Physics and associate professor at Nova Scotia Health
- Professor of radiation oncology at Dalhousie University
- Fellow of the Canadian College of Physicists in Medicine

### Contributions and Achievements

- 25-year collaborator with Brainlab
- Co-author of the Novalis Standards
- 15 years of experience as a reviewer of medical physics graduate programs

“Novalis Certification exists to ensure that advanced technologies for SRS and SBRT are being implemented in accordance with best practices on a consistent basis.”
